

Egyptian Council for creativity, innovation
and intellectual property Protection

Invent for a better world

Cognitive and intellectual balance for human societies since its inception is the first creation of the human mind in different spheres of scientific, literary and artistic productions that make the whole world recognizes the importance of protecting innovation and creativity.

protection of intellectual property rights (with WTO agreements into force in 1995 and the signing of the agreement on trade-related aspects of intellectual property rights, known as TRIPS), made it compulsory to all world countries to review their domestic legislation to comply with the provisions of the Convention which we felt with the need for us to establish Non-profit entity that promotes innovation and creativity and the study of various intellectual property issues.

Our Aim is working to enhance the knowledge of the Egyptian and Arab community of the importance of innovation and creativity, intellectual property protection and information protection also, considering identity themes from the national perspective, and maintaining public interest with our commitment and respect for all international treaties in this regard.

Mission

- Cultural Awareness of innovation, creativity, and intellectual property rights protection and promotion mechanisms and building cadres capable of operating as a single integrated system at the Egyptian, Arab and international levels.
- participation in progressing economic development and investment in innovative and creative methodologies

Goals

- encouraging innovators and creators of all ages.
- supporting intellectual property rights holders to protect their innovations, creations and compositions.
- publicizing the importance of innovation, creativity and economic effects on development, particularly with regard to industry, health, agriculture, archaeology, art, music, education and technology.
- study development of legislation for the protection of intellectual property rights in Egypt and the Arab world.

Responsibilities

- training workshops for innovators and creators as well as the labour working in all sectors, universities, scientific institutes and research centers.
- Establishing a databank contains the laws and international treaties, studies and research in the field (Patent-Trademark-Copyright and related rights ..etc.)
- conferences and seminars to share experiences and communicate with donors and international organizations and the latest developments in this area.

Why Join Us

- participate in conferences, seminars and training courses.
- possibility for the Council to mediate in matters concerning support for innovative and creative products and matters relating to the rights deriving from intellectual property topics.
- join a database of inventors and innovators correlated to the Egyptian Council of innovation and creativity.
- benefit from in-house data bank Board.
- As donors and international organizations prefer to cooperate with institutions, associations, non-profits working for community service, rather than dealing with individuals, with respect to access to or support the proposals of the developing legislation and administrative regulations and the exchange of experiences, etc.
- publish research or studies or access to research, studies, statistics and other publications issued by the Council.
